

SIMPLY CLICK TO DISCONNECT FOR A WHILE

Griff

TIME FOR ME TIME

In open-plan living concepts particularly, privacy becomes all the more valuable. By privacy we mean that people want to keep some "space for themselves". Such space can be defined temporarily and flexibly by using doors and fittings. After all, people who live together want to withdraw once in a while. Living space needs a balance between openness and privacy. Fittings as functional elements of doors can add value here. With smart2lock by GRIFFWERK, we have developed a locking system that is integrated into the handle that, due to its puristic aesthetics, is not merely reserved for bathrooms or WCs. smart2lock by GRIFFWERK fits any door. smart2lock by GRIFFWERK opens up even more space for very personal me time in any home.

ANY ROOM CAN BECOME A PERSONAL RETREAT

WITH A CLICK ON THE DOOR HANDLE

4

MORE ME TIME

Space for myself. Time for myself. Me time. Whether soothing relaxation in the bathroom, a refreshing power nap in the bedroom, focussed work in the home office or undisturbed chilling in the teenager room: smart2lock by GRIFFWERK gives more me time.

IN ANY ROOM

smart2lock by GRIFFWERK stands for integrated locking systems with intuitive usability. The locking slider is conveniently within thumb reach. With smart2lock by GRIFFWERK, doors can be closed and locked with one hand. Escutcheons become unnecessary. The result is a new, puristic door aesthetic. Door handles with smart2lock by GRIFFWERK. fit conventional standard door locks. Because of their minimalist look, they are not only suitable for bathrooms or WCs, but also for guest rooms, a home gym, yoga room, a teenager's room or the parents' suite...

Minimalist solution: The emergency release is located behind the signal point. (Door handles with smart2lock by GRIFFWERK without escutcheons).

THE MOST BEAUTIFUL BREAK SIGN ...

... is a red point. It indicates on the outside whether the door is locked. Quiet and discreet. It means: "Do not disturb: Someone needs time for themselves." The simple locking slider on the inside of the door activates the status display. At the same time, the emergency release is located behind the signal point. A pointed object, e.g. a pen, suffices to open the door. Only in emergencies, of course. Escutcheons are a thing of the past.

LUCIA IN GRAPHITE BLACK

Door handles in graphite black add a touch of loft character to the ambience. We chose a deep, matt black tone with the finest grain for a comfortable grip. Graphite black door handles are an eye catcher on white doors, whether sleek or stylish, and look especially beautiful with natural wood finishes. The absence of escutcheons creates a pleasant, minimalist overall effect. The room shines in its architectural quality. It adds value not only to interior rooms, but also corridors. The "break point" on the handle indicates that someone doesn't want to be disturbed right now.

R8 ONE IN CASHMERE GREY

The door to another world – your own. The R8 ONE door handle opens up new perspectives and fits perfectly into minimalist living styles with its highly reduced design language. The handles of the ONE by GRIFFWERK concept series fit all standard locks and are available in the premium finishes velvet grey, graphite black and cashmere grey with a pleasant soft2touch feel. The concealed hinges ensure a visually integrated solution.

GRIFFWERK offers matching hinges in cashmere grey.

SIMPLY SAVING THE WORLD FOR A SHORT WHILE

Integrated emergency release. Very easy to unlock, for example using a coin.

R8 ONE IN GRAPHITE BLACK

When the job calls in your home office, quiet and focus are the order of the day. In order to achieve the best results, simplicity and clear contrasts prevail in offices. In a home office, however, it can also be comfortable. Personal style can be lived and the working atmosphere can be individually designed. The entrance already gives a first impression. The R8 ONE door handle in a clear, geometric design offers feel-good qualities: The back is gently rounded, the finish offers a special tactile experience thanks to soft2touch by GRIFFWERK. Luxury for your hands. Why not in the office as well?

GRIFFWERK offers matching hinges in graphite black.

AVUS ONE IN GRAPHITE BLACK

Love needs quietude. smart2lock gives you a break from the (equally beloved) family. Suitable for a minimalist furnishing style with a homely touch: the AVUS ONE door handle. The design of the body was fully reduced to basic geometric shapes: Two semicircles capture the surrounding outline of the front surface. Available in the premium graphite black finish and with a pleasantly soft soft2touch feel.

AVUS ONE SMART Graphite black

AVUS ONE IN VELVET GREY

The design is named after the Berlin race track "Avus" with its two large hairpin bends. A strictly geometric design, formed from a rectangle and two semicircular segments. The front surface runs parallel to the door leaf. The gently rounded back offers a pleasant feel. A perfect handle for a puristic ambience. Authentic materials, clear lines, few but carefully selected elements offer visual calm. By refining the surface with soft2touch by GRIFFWERK, AVUS ONE offers an exceptional tactile experience.

GRIFFWERK offers matching hinges in velvet grey.

OPULENCE VERSUS INNOCENCE

Interior design is an expression of personality. A visualization of values, habits, trends and zeitgeist Whether as part of an opulent mix of materials with exuberant abundance or in minimalist interior design - each seperate element contributes to the overall picture. Our two interiors with ONE door handles in brushed gold and silk white couldn't be more different. Which would be your ONE?

PURISTO S FOR HINGED GLASS DOORS

A lock case for all-glass doors in a smaller format with plenty of user comfort. Lockable with smart2lock by GRIFFWERK. The locking slider is conveniently within thumb reach. PURISTOS also offers convenient adjustment options: The spring force of the door handle can be individually adjusted and the handle position can be corrected with millimetre precision. Three colour shades available: Graphite black,cashmere grey and velvet grey/satin stainless steel effect. Can be combined with door handles from many design lines, including those with a magnetic latchbolt. Complete systems from door handles to window handles to security door handles. Matching hinges with matching colour.

SLIDING DOOR SYSTEMS

With the delicate looking bar handle, PLANEO GS 49017, in a minimalist design, sliding doors can even be locked (design: Studio Relvão Kellermann). The discreetly designed control element is located on the bar, the locking mechanism is concealed in the running rail. A lit red signal point indicates the status. The mechanical emergency release always works, with or without power. Combined with frosted glass doors, visual cover is still an option. Perfect for bathrooms. In three finishes: Graphite black, cashmere grey and satin stainless steel effect.

PRODUCT OVERVIEW

Existing escutcheons can be replaced with a blank escutcheon.

SCREW-ON SYSTEM for high stress, substructure made of metal. The screw connection is invisibly integrated and meets the requirements of DIN EN 1906 Cl3.
